JALTECH'S OFF-EXCHANGE CRYPTOCURRENCY SAFETY DEPOSIT BOX

**A SIMPLE, COST-EFFECTIVE, AND ULTRA-SECURE
CRYPTOCURRENCY STORAGE SOLUTION**

Jaltech offers private individuals, institutions, and corporates a seamless, cost-effective, and a safer alternative storage option to holding cryptocurrencies themselves or on a cryptocurrency exchange.

Jaltech's storage solution has integrated with Fireblocks, the world's leading cryptocurrency storage provider, and requires multiple independent parties to approve withdrawals.

SERVICE HIGHLIGHTS

- » Third-party approval
- » In-person/virtual authentication
- » Gold standard technology provider
- » Battle-tested security platform
- » Accessible by heirs & financial advisors
- » Secure over 1000 different types of cryptocurrencies

WHY REMOVE YOUR CRYPTOCURRENCY OFF-EXCHANGE OR A DIGITAL WALLET? OVER R56 BILLION OF CRYPTOCURRENCIES HAVE BEEN STOLEN FROM ONLINE EXCHANGES

Cryptocurrency investors face numerous risks when holding cryptocurrencies themselves or on a cryptocurrency exchange, these risks are increased given the crime rate in South Africa.

The most prominent risks include:

CRYPTO EXCHANGE RISK

Exchanges have for many years been targeted by cybercriminals as large volumes of value are stored centrally on their platforms. Thus, by successfully hacking an exchange, criminals have access to billions of Rands of value which can be transferred anonymously with no recourse for victims.

ACCESSIBILITY RISK

Often investors fail to provide their partners, heirs, or financial advisors with the necessary information to locate and access their cryptocurrencies. Therefore, tracing and accessing an investor's cryptocurrencies upon death can, in many instances, be impossible. An additional risk is that an investor loses, forgets, or incorrectly backs-up their password and consequently will never be able to access their digital wallet.

SOUTH AFRICAN RISK

The average South African investor holds his/her cryptocurrency on their cell phone through an app supplied by an exchange. This exposes investors to phishing attacks and to the possibility of criminals forcing investors to transfer their cryptocurrencies to an anonymous account. Effectively, many South Africans are walking around daily with hundreds of thousands of Rands in their pocket exposing them to criminal attacks.

MISMANAGEMENT OF FUNDS

Investors don't have oversight into the business affairs of exchanges and have suffered financial losses due to exchanges mismanaging investors' cryptocurrencies. During 2022, several prominent exchanges and lenders have frozen withdrawals and locked investors from accessing their assets due to gross negligence and mismanagement of depositors' funds.

WHY JALTECH'S SAFETY DEPOSIT BOX IS SAFER THAN A CRYPTOCURRENCY EXCHANGE

THIRD-PARTY APPROVAL

Jaltech has appointed independent senior attorneys and accountants. Their role is to act as an independent party to provide final approval on individual requests to withdraw cryptocurrencies of more than a predetermined value.

TRANSFERRED OFF AN EXCHANGE

All cryptocurrencies under Jaltech's custody are held off exchange. This step completely removes an investor's exposure to the risks of being on a cryptocurrency exchange.

IN-PERSON/VIRTUAL AUTHENTICATION

All individual requests to withdraw cryptocurrencies will be authenticated in person or via a virtual meeting. This process mitigates the potential of a fraudulent withdrawal request being submitted.

ACCESSED BY HEIRS AND FINANCIAL ADVISORS

Jaltech's service allows heirs and financial advisors access to their family member's or clients' cryptocurrency as a contingency if/when the need arises.

NO SINGLE POINT OF FAILURE

The Multi-Party Computation protocols ensure that cryptocurrencies/tokens are not accessible nor transferrable from any single point or by any single person.

GOLD STANDARD TECHNOLOGY PROVIDER

Jaltech has appointed the world's leading cryptocurrency custody provider Fireblocks. Fireblocks has processed over R50 trillion in cryptocurrencies and provides services to over 1 300 financial institutions globally.

ACCESSIBLE BY THE CLIENT

Customers aren't required to provide usernames and passwords when requesting access to their cryptocurrencies.

MITIGATING CRIME RISK

Clients do not have access to their cryptocurrencies either in an offline environment or via a connected device (i.e. their cell phone), thus minimising the possibility of a criminal event taking place.

CRYPTOCURRENCY STORAGE OPTIONS

	Hardware wallet	Exchange	Paper wallet	Jaltech Safety Deposit Box
Hacking or theft risk	Low	Medium to high	Low	Low
Risk of losing access to vital information	Medium	Low	High	Very low
Multi-signature	✗	✗	✗	✓
Off exchange storage	✓	✗	✓	✓
Single point of failure eliminated	✗	✗	✗	✓
Estate planning	✗	✗	✗	✓

FEES

Jaltech's fee structure is aligned with long-term investors and is focused on providing a cost-effective alternative to storing cryptocurrency on an exchange.

Annual fee	0.5%	
Withdrawal fees (excluding network fees)*	First year	2%
	Second year	1%
	Third year +	0.5%

*Network fees are unavoidable and are incurred at a network level (non-Jaltech revenue). Typically, these fees are less than R10 but are dependent on network conditions at the time of a transaction.
